

# ChelWater & Wastewater Facility 13031 East Caley Avenue

Chelwater & Wastewater Water Authority provides the drinking water and wastewater services to the people living and working within its service area across Chelsea County USA.

## Water Operations

Learn more about the cooperative facilities used by the Arapahoe County Water and Wastewater Authority and Cottonwood Water and Sanitation District.

## Facilities

## Facility Tours

Do you know how water gets to your faucet and the processes that happen to ensure its quality and safety? Have you ever wondered what happens to the dirty water from your shower, bath, laundry and toilet after it goes down the drain? We invite you to take a free tour of our water or wastewater treatment plants to find out how our utility system works.

## Regulation 84

The purpose of Regulation 84 is to establish requirements, prohibitions, standards, and concentration limits for the use of reclaimed water to protect the public health and environment while encouraging the use of reclaimed water.

## Programs & Projects

Understand the inner workings of the programs and projects.

## Water Quality

Information regarding Water Quality, Drinking Water Reports, and common causes and solutions; like spotting and residue, color or staining, and odor.

Our service area has approximately 73 miles of sanitary sewer lines, 3,073 manholes and 3 lift stations within its sanitary sewer system. While sanitary sewer system problems are not common, ChelWater and Waste Water is instituting a Sanitary Sewer Maintenance Program, which is intended to avoid or minimize problems to the maximum extent possible. The first phase of cleaning will begin in mid-September 2018 and will run through the end of the year.
